**KNITMAX
 WARP KNOTTING MACHINE**

KNITMAX warp knotting machine is an innovative universal warp knotting solution for warp knitting industry and narrow weaving industry.

Compact structure: only very narrow space required for knotting process, easy handling

Easy operation: every warp knitting machine operator is a master

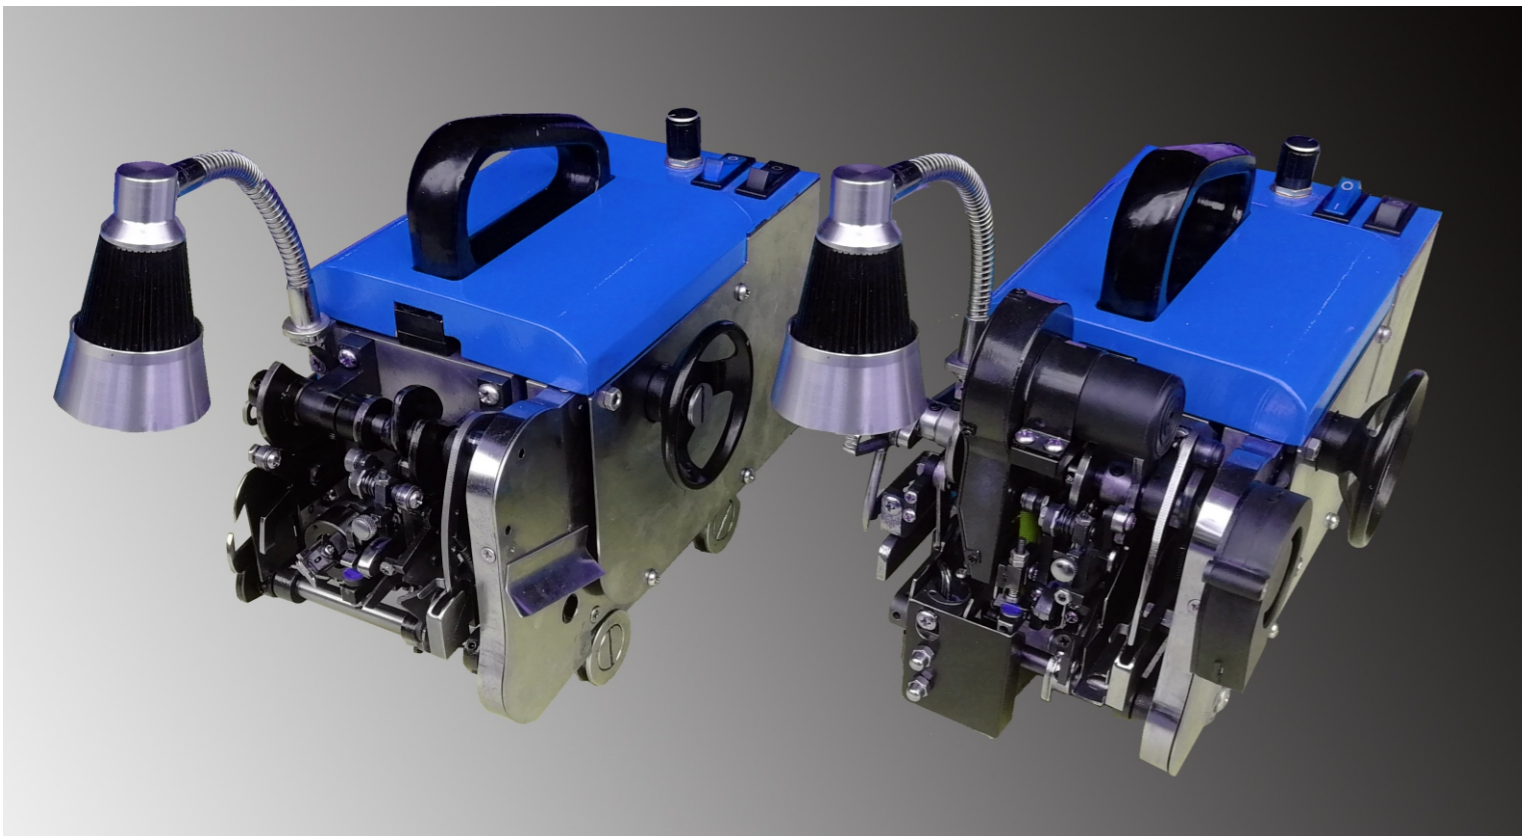

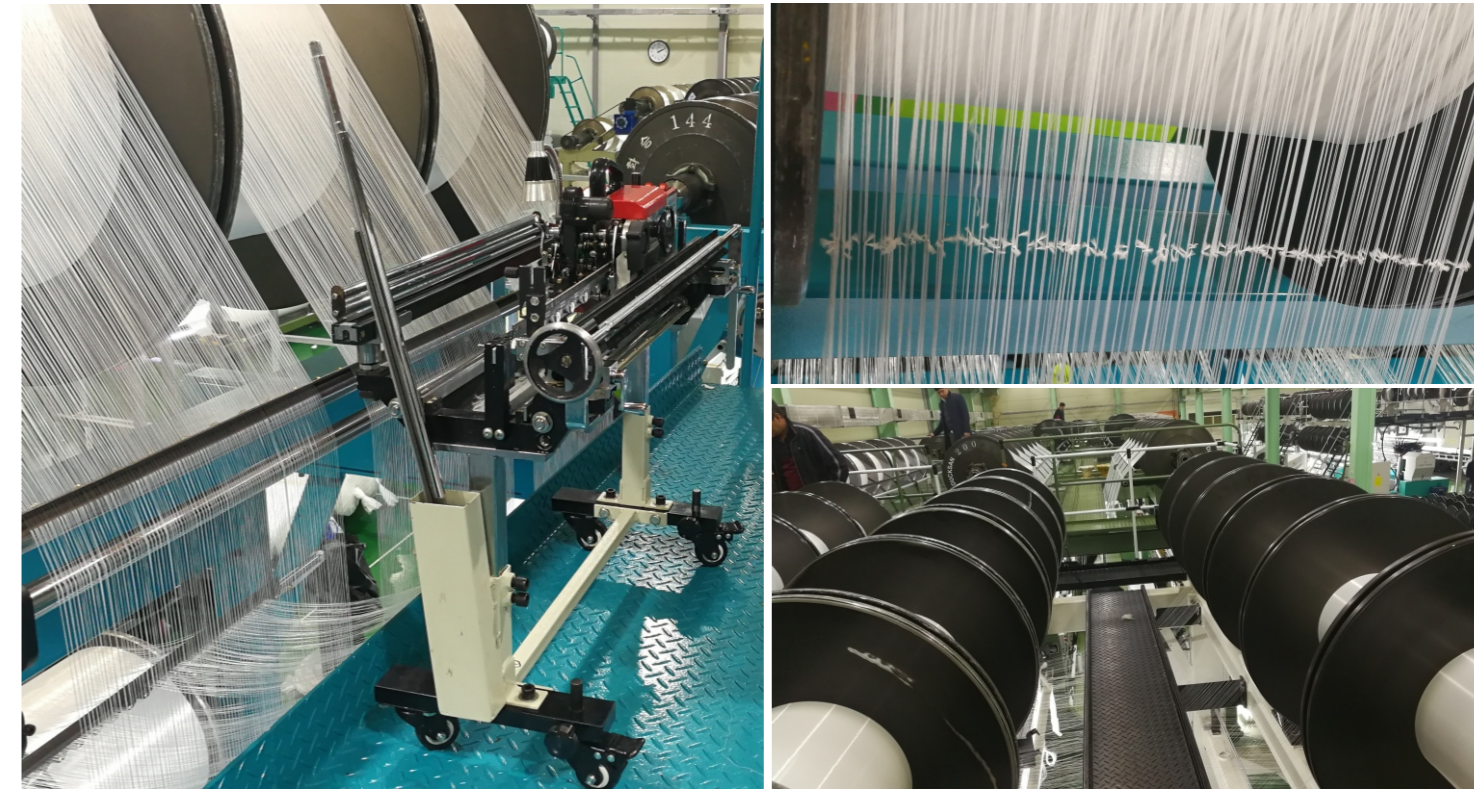

Time saving: knotting time/beam < 2 minutes, skilled dressing time/beam < 8 minutes

Perfect knotting: 100% mistake-free knotting

Easy knot pass: tiny knot tail of 5-15mm or 22mm only, free from trimming work

Brushless motor: specially made, heatless

Wide application: DTY, FDY, Monofilament yarns on Karl Mayer and Chinese warp knitting machines and Muller needle looms

Main Technical Features

MODEL	KNITMAX	KNITMAX-T	KNITMAX-TD
Knot type	single knot	single knot	double knot
Yarn range	20d-200d	30d-1000d	20d-1000d
Beam width	<=21" (or max 42")		
Working speed	150-300 knots/minute		
Stop Control	stop on overload		
Knot tail length	0.5cm	1.5cm	2.2cm
Lease condition	warp yarn without lease		
Power supply	24VDC 3.5A (Power supply by battery optional)		
Packing dimension	110cm*40cm*40cm		
Machine weight	8.7kgs		
Knotting frame	19kgs (21")
